sales to grow

## HOT PRODUCTS

Made of 100% cedar, the swing set from **Eastern Jungle Gym** spotlights heavy duty hardware and fun accessories such as slides and a rock climbing wall.

**India House Brass** torches feature snuffer caps, powder-coated garden poles and long lasting fiber glass wicks. Each easy-fill container holds 30 ounces of citronella oil and burns for 10 to 12 hours.

**Flexx Market Umbrellas** offers a patent pending stainless steel spring component that will help extend the life of an umbrella. When wind is present the spring allows the canopy to flex in any direction, which relieves pressure on the canopy ribs as well as the pole.

With the rich color and warm texture of rattan peel, **Lloyd/Flanders'** Contempo Collection chair combines function and style for a truly sophisticated design. The straightforward and clean design is crafted of large-scale synthetic vinyl.

A map of the world spans across an aqua background on the **Save the Planet** doormat from **Imports Unlimited**. Made from 100% hand-woven, all natural coco fiber, the design is decorated in richly colored fade resistant dyes.

The **KuulAire 77 (KA77)** evaporative cooling unit from **Port-A-Cool** fits comfortably into outdoor settings to cool up to 600 square feet. The unit uses water to cool the air naturally to provide an enjoyable environment.
